Submission content: 1. Don't destroy ANY current green space. We need as much natural environment as possible. 2. Concentrate on developing public transport at the expense of individual vehicles. 3. Keep property developers out of the planning process. They have no public interest, their only interest is profit. 4. Get rid of the PR nonsense in the priority descriptions. We all know you are only consulting in order to say you have done so, not to take out views into account.
